PROFESSIONAL SUMMARY

Final-year B.E. (Electronics & Telecommunication) student and RPA / Intelligent Automation developer. Completed an RPA internship building bots in AutomationEdge Process Studio, holds AutomationEdge Foundation and Intermediate certifications, and builds AI-powered workflows with n8n, LangChain and LangGraph. Seeking RPA Developer and Intelligent Automation roles.

TECHNICAL SKILLS

RPA & Automation: AutomationEdge (Process Studio) · n8n · Workflow Orchestration · Exception Handling · Bot Deployment · Document Processing
Integration: REST APIs · JSON · Webhooks
AI for Automation: LLMs · RAG · LangChain · LangGraph · AI Agents · Prompt Engineering
Programming & Tools: Python · SQLite · Flask · FastAPI · Streamlit · Git
Also: PyTorch · YOLOv5 · OpenCV · C++ · Pandas

EXPERIENCE

RPA Trainee Intern · ValueDX Technologies, Pune **June 2026 – Sep 2026**

- Built enterprise RPA workflows in AutomationEdge Process Studio using JSON, REST APIs and document processing.
- Implemented exception handling and debugging, and deployed bots following automation best practices.

Generative AI & Agentic Systems Intern · Lenovo LEAP × AICTE (Remote) **June 2026 – July 2026**

- Developed LLM-based applications and agentic AI pipelines; applied prompt engineering.
- Delivered CityFix AI, a multi-agent system, as the capstone project.

Python Developer Intern · MASS IT Solutions LLP, Pune **Jan 2026 – Feb 2026**

- Built Python modules and end-to-end model pipelines (preprocessing, augmentation, evaluation, inference) in PyTorch and YOLOv5.
- Tuned performance and reduced inference latency for real-time use.

PROJECTS

AI Agent & Workflow Automation Platform **2025**

n8n · Python · REST APIs · LLM Integration · Webhooks

- Designed multi-step n8n workflows that connect LLM nodes to REST APIs for intelligent document routing.
- Used webhooks to trigger workflows and pass data between systems.

CityFix AI — Multi-Agent Civic Issue Reporting System **2026 – Present**

LangGraph · Groq (Llama 3.3 70B) · Streamlit · SQLite · Plotly

- Designed a multi-agent LangGraph workflow that identifies civic issues from user photos (potholes, broken streetlights), categorises them and routes them automatically.
- Added location pinning on a map and auto-generated PDF reports, removing manual reporting work.

LoanDesk — RAG-Based Loan Advisory Chatbot **2025**

LangChain · ChromaDB · Python · Streamlit · LLM API

- Built a RAG pipeline over loan-policy PDFs: document ingestion, chunking, embeddings, ChromaDB retrieval and LLM answer generation, with sub-2s response latency.
- Built a Streamlit interface for PDF upload and conversational querying.

EDUCATION

B.E. — Electronics & Telecommunication · SKNCOE, Pune **Aug 2023 – Present**
CGPA: 7.63 | Latest SGPA: 8.52

HSC (Science) · GRPS College of Science, Pune · Maharashtra State Board **2021 – 2023**
Percentage: 63.5%

SSC · Maharashtra State Board **Percentage: 94%**

CERTIFICATIONS

AutomationEdge Foundation & Intermediate · AutomationEdge Academy (2026) | Gen AI 101 · FutureSkills Prime, Nasscom (Apr 2026) | Gen AI Engineering Mastermind · Outskill (2026)
